

All cabin areas must have at least two exit routes. Forward cabins should thus be able to easily access the foredeck hatch via the inner hull side, or the optional bow hatch through the forward bulkhead.

This is a good cruising layout for a small crew, with galley on the bridgedeck, and navigation table facing forward. Dinette can seat four easily, and up to eight with additional stools. Accommodation can be limited to two double or one double and one twin cabins, with two large separate head and shower areas.

**All interior options as shown on Sheets 26 to 32 can be mixed or matched. No. and type of berths can be as required.**

Scale 1 : 50
