

Overall Height on Trailer is approx. 2.6 - 2.67m  
 (8' 7" - 8' 9") depending on trailer and wheel size.  
 Measure to be safe.

Trailer lights - Check with local regulations for correct light configuration. Tail lights are best on separate removable brackets mounted on Transom, with cable run independently over boat. Avoid trailer mounted lights - salt water soon renders them inoperative. Local regulations may also require lights to be at or near the aft end of the trailer/boat.

**TRADITIONAL STEEL TYPE TRAILER SHOWN**

Scale 1 : 30
